APPENDIX A

Notice of Preparation and Summary Comment Matrix

NOTICE OF PREPARATION OF AN ENVIRONMENTAL IMPACT REPORT AND PUBLIC SCOPING MEETING

DATE: February 14, 2022

TO:

Governor's Office of Planning and Research State Clearinghouse, Responsible Agencies, Trustee Agencies, Organizations, and Interested Parties

LEAD AGENCY: County of Los Angeles

PROJECT

PROPONENT: Los Angeles County Museum of Natural History Foundation 900 Exposition Boulevard, Los Angeles, CA 90007

SUBJECT: Notice of Preparation of an Environmental Impact Report and Notice of Public Scoping Meeting for the Proposed La Brea Tar Pits Master Plan Project

The County of Los Angeles (County) is the lead agency pursuant to the California Environmental Quality Act (CEQA) and intends to prepare an Environmental Impact Report (EIR) for the proposed La Brea Tar Pits Master Plan Project (project). The County has prepared this notice of preparation (NOP) to provide responsible agencies, trustee agencies, organizations, and other interested parties with information describing the project and to identify the project's probable environmental effects pursuant to State of California requirements. The County seeks input from responsible agencies, trustee agencies, other affected public agencies, the public, and others regarding the scope and contents of the EIR.

The La Brea Tar Pits and the George C. Page Museum (Page Museum), located in portions of the 23-acre Hancock Park, including buildings, facilities, recreation areas, and the tar pits, are owned by the County but are managed by the nonprofit Los Angeles County Museum of Natural History Foundation (Foundation). The Foundation's role is to carry out all County services including public access and programming, administration, and operation of the Natural History Museums of Los Angeles County (NHMLAC), including the La Brea Tar Pits and Page Museum.

PROJECT LOCATION AND OVERVIEW

As shown in Figures 1 and 2, the La Brea Tar Pits Master Plan property (project site) is located at 5801 Wilshire Boulevard in the Miracle Mile neighborhood of Los Angeles. The 13-acre project site occupies the eastern and northeastern portions of the 23-acre Hancock Park. The project site broadly encompasses what is known as the La Brea Tar Pits, which includes the Page Museum; the physical tar pit features located within the Hancock Park grounds, some of which are

research sites; the concession and public restroom building; a multipurpose lawn, recreation areas, and landscaped features throughout the park; and a surface parking lot.

The Los Angeles County Museum of Art (LACMA) is adjacent to the project site and also partially within Hancock Park; LACMA's facilities are not included in the project.

The La Brea Tar Pits Master Plan site is bounded by Wilshire Boulevard to the south, West Sixth Street to the north, South Curson Avenue to the east, and LACMA to the west. Also located to the west and just beyond LACMA's facilities are the Academy Museum of Motion Pictures and South Fairfax Avenue.

PROJECT DESCRIPTION

The proposed project would renovate the existing Page Museum and add a new one-story museum building toward the northwest, increasing the total museum square footage from 63,000 gross square feet (gsf) to 105,000 gsf (Figure 3). The new museum building would include a lobby and exhibit spaces, two theaters, a mechanical equipment room, research and collections rooms, administration spaces, and a loading dock.

The renovation of the Page Museum would remove the vegetation in the existing central atrium and improve the facility to allow for additional exhibition, classroom, and laboratory spaces. The renovation would also allow much of the collection space to be reorganized and enlarged to provide better display of the collections to the public. As part of the project, a café could be added to the outdoor terrace on the western side of the Page Museum.

The existing parking lot would be shifted to the northeast. However, it is not anticipated that there would be a substantial change in the amount of parking provided. The project would add new landscaping and vehicle access lanes to the parking lot, with an additional pedestrian entrance to the museum leading from the parking lot. A new 2,000-gsf support building would be constructed for additional exhibit, presentation, storage, administration, and research space directly west of the parking lot.

The project would add the following improvements to Hancock Park: a pedestrian path (improving pedestrian circulation within the project site), additional seating and rest areas, a Wilshire Gateway entry plaza at the southeastern corner of the site, a 6th Street Gateway entry plaza at the northwestern corner of the site, a pedestrian bridge over the Lake Pit, three pavilions with canopies, and new and enhanced recreation areas. Enhanced landscaping would also be provided, including native vegetation plantings and a garden bioswale to improve stormwater infiltration.

The phasing and the timing of construction to be proposed is currently under study by the NHMLAC and will be further detailed in the EIR. However, it is expected that construction would be completed in approximately 7 to 10 years. Construction activity is not anticipated to occur consistently over this duration, but rather would be phased as funding becomes available. Limiting construction impacts to the community will be an important consideration in the determination of the final construction plan.

PROBABLE ENVIRONMENTAL EFFECTS OF THE PROJECT

Based on a preliminary review of the proposed project and consistent with Section 15060(d) of the CEQA Guidelines, the County has determined that a comprehensive EIR will be prepared for the project. Therefore, all of the topics identified in Appendix G of the CEQA Guidelines (the initial study checklist) will undergo study in the EIR.

The environmental effects to be analyzed in the EIR will include, but are not limited to, the following:

Transportation: A transportation impact analysis will be prepared for the EIR to describe the existing local and regional transportation network and to evaluate the proposed project's construction-related and operations-related traffic impacts for vehicular, transit, bike, and pedestrian circulation. The EIR will analyze whether the project would conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadways, bicycle, and pedestrian facilities. The project's impacts to traffic and transportation and their level of significance will be assessed in detail in the EIR.

Paleontological Resources: Hancock Park and the La Brea Tar Pits were designated as a National Natural Landmark in 1962, due to the world-famous asphalt tar pits and because of the site's important history related to Pleistocene animal fossils. The site is recognized for having the largest and most diverse assemblage of extinct plants and animals in the world and continues to support active discovery and research related to the asphalt tar pits. Subsurface paleontological resources could be discovered during construction of project components, particularly during excavation for construction of the new museum building. The potential for impacts to paleontological resources will be evaluated in the EIR and appropriate discovery and treatment measures will be developed and presented in the EIR.

Cultural Resources: The EIR will provide an assessment of the potential effects of the project on cultural resources. The EIR will include an inventory of archaeological, historic, and culturally sensitive resources and will describe the potential for cultural resources to be adversely impacted during construction or operation of project components, particularly during excavation for the construction of the new museum building. Consideration will be given to the potential for effects on the historic sensitivity of the project site and its features. Specifically, Hancock Park and the La Brea Tar Pits were designated as eligible for listing in the National Register of Historic Places in 1984.

Tribal Cultural Resources: In accordance with Assembly Bill 52 (Government Code Section 65352.4), the Native American Heritage Commission and any tribes it identifies will be contacted and consulted about the presence of traditional lands or cultural places in the proposed project vicinity; potential impacts to tribal cultural resources will be identified in the EIR.

Air Quality: Construction of the project would generate emissions from construction equipment exhaust, earth movement, construction workers' commutes, and material hauling. The EIR will provide an estimate of construction-related emissions as well as long-term operational emissions of project components. The EIR will also provide an evaluation of the project's consistency with regional air quality attainment plans and the potential health impacts associated with project construction and operation emissions to local and regional sensitive receptors.

Greenhouse Gas Emissions: The EIR will provide a quantification of greenhouse gas emissions associated with proposed construction and operation in terms of carbon dioxide equivalent emissions. The estimated greenhouse gas emissions will be compared to regional thresholds of significance and impacts will be identified. The proposed project's consistency with the County's Community Climate Action Plan and other applicable plans will also be addressed.

Noise: The EIR will identify sensitive noise receptors and sources of noise and vibration in the project area and will analyze short-term construction and long-term operational noise and vibration impacts, where feasible. The construction analysis will use established modeling methods (e.g., the Federal Highway Administration Roadway Construction Noise Model and the Federal Transit Administration Noise and Vibration Manual). The EIR will provide an analysis of the project's potential to generate substantial temporary or permanent increases in ambient noise levels near the project in excess of standards established in the local general plan or noise ordinance or applicable standards of other agencies.

Geology and Soils: The EIR will provide an analysis of geologic hazards, including the potential for seismic hazards, such as rupture of a known earthquake fault, seismic ground shaking, or seismic-related ground failure, including liquefaction, landslides, substantial erosion or the loss of topsoil, lateral spreading, subsidence, collapse, and expansive soils.

Hazards and Hazardous Materials: The project site is not located on a list of hazardous waste sites compiled pursuant to Government Code Section 65962.5 (i.e., the Cortese List). However, further analysis of hazardous materials will occur to support the EIR. The EIR will describe the existing hazardous materials conditions on and adjacent to the project site, including the potential for existing soil or groundwater contamination, and will identify hazardous impacts from both construction and operations. Specifically, the EIR will analyze whether the project

would create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials.

NOTICE OF SCOPING MEETING

The County will conduct two virtual public scoping meetings to solicit oral and written comments from interested parties as to the appropriate scope and content of the EIR.

All interested parties are invited to attend one of the scoping meetings to assist with identifying issues to be addressed in the EIR. Both scoping meetings will include a brief presentation of the project to be addressed in the EIR and will provide attendees with an opportunity to provide input on the scope of the EIR. Each scoping meeting will provide the same presentation. Participants that register will be able to join either meeting. The following meeting start times are available:

- Wednesday, March 2, 2022, 2:30 p.m.
- Wednesday, March 2, 2022, 5:30 p.m.

To join at either of these times, please register at the following link to receive the Zoom connection information:

https://swca.zoom.us/webinar/register/WN_LgiNknH7StmHTjCCZAP0Yg

Live language interpretation of the presentation and scoping meeting input will be provided in Spanish and Korean during the scoping meeting. Interpretation in other languages can be made available at the meeting upon request. Please submit interpretation requests at least 7 business days in advance of the meeting date to Richard Hayden at reimagine@tarpits.org.

PUBLIC REVIEW PERIOD

The County has made this NOP available for public review and comment pursuant to the CEQA Guidelines Section 15082(b). The County is seeking input from public agencies and members of the public on the intended scope and contents of the environmental information and analysis in the EIR. Due to the time limits mandated by state law, written comments must be sent via United States Postal Service or email within 30 days, postmarked or emailed no later than **5:30 p.m. Pacific Time on Wednesday, March 16, 2022**.

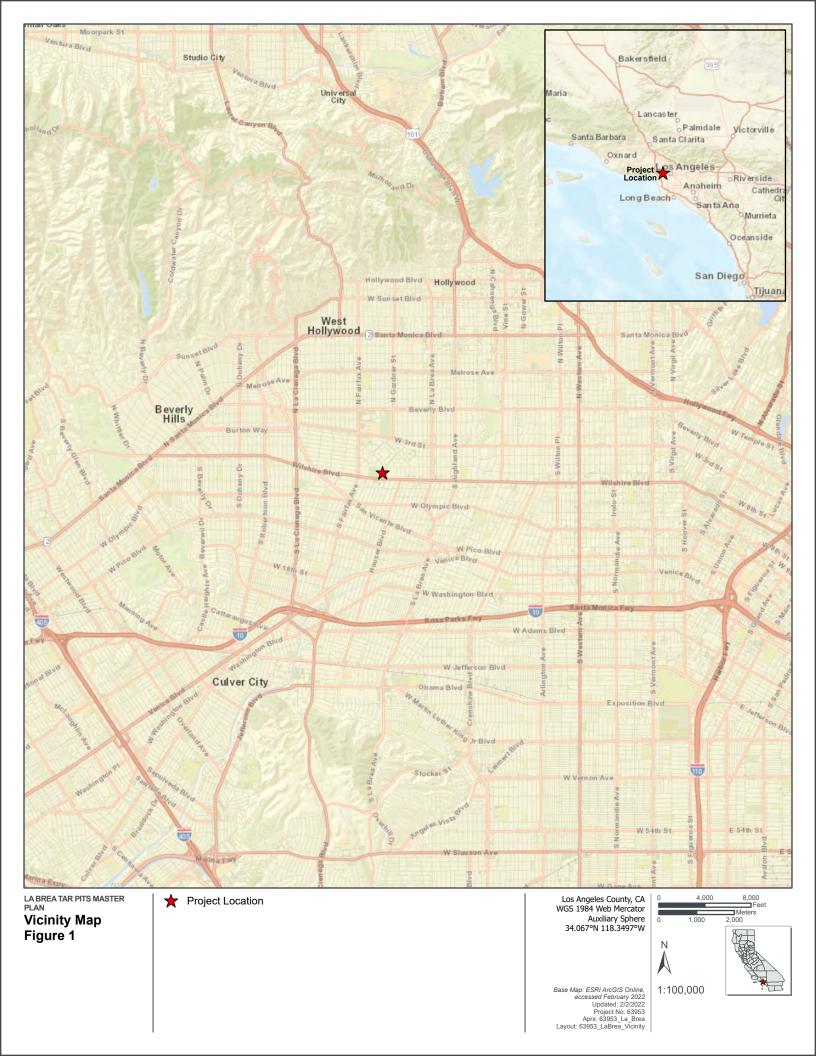

Any comments provided should identify specific topics of environmental concern and the reason for suggesting the study of these topics in the EIR. All comments will be considered in defining the scope of the EIR in accordance with State and County environmental guidelines. Please direct all written comments to the following address:

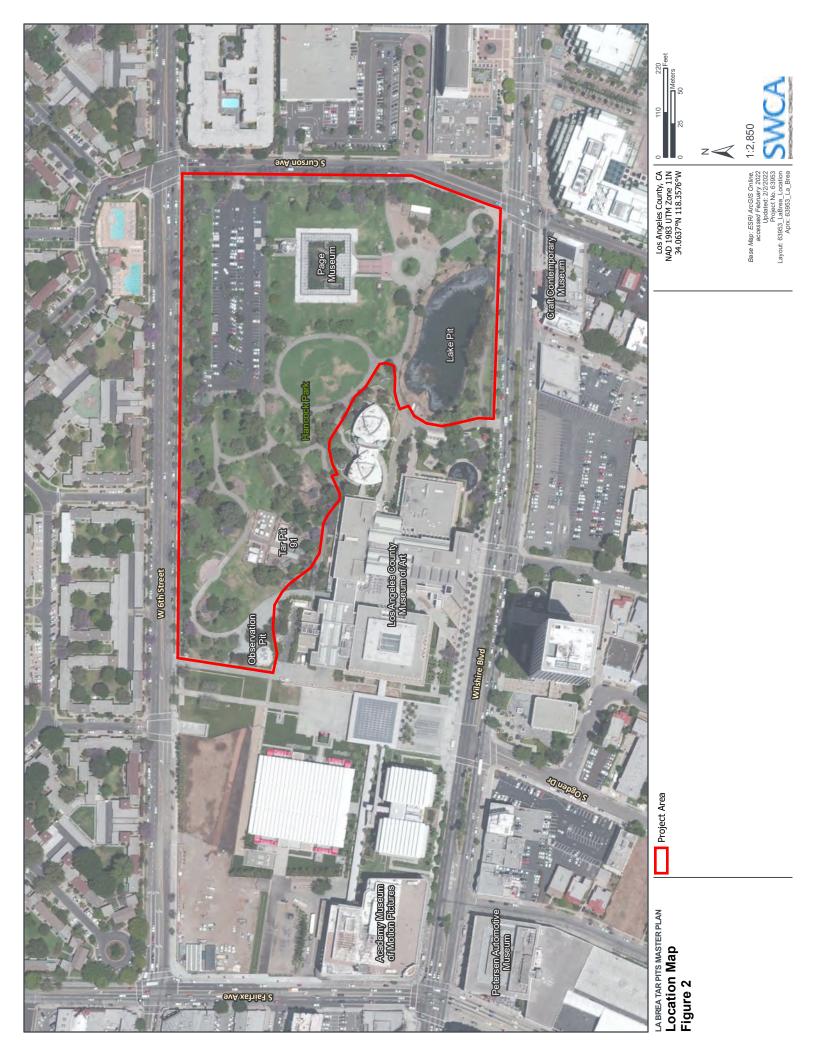

Richard Hayden, Assistant Deputy Director Natural History Museums of Los Angeles County 900 Exposition Boulevard Los Angeles, CA 90007 <u>reimagine@tarpits.org</u>

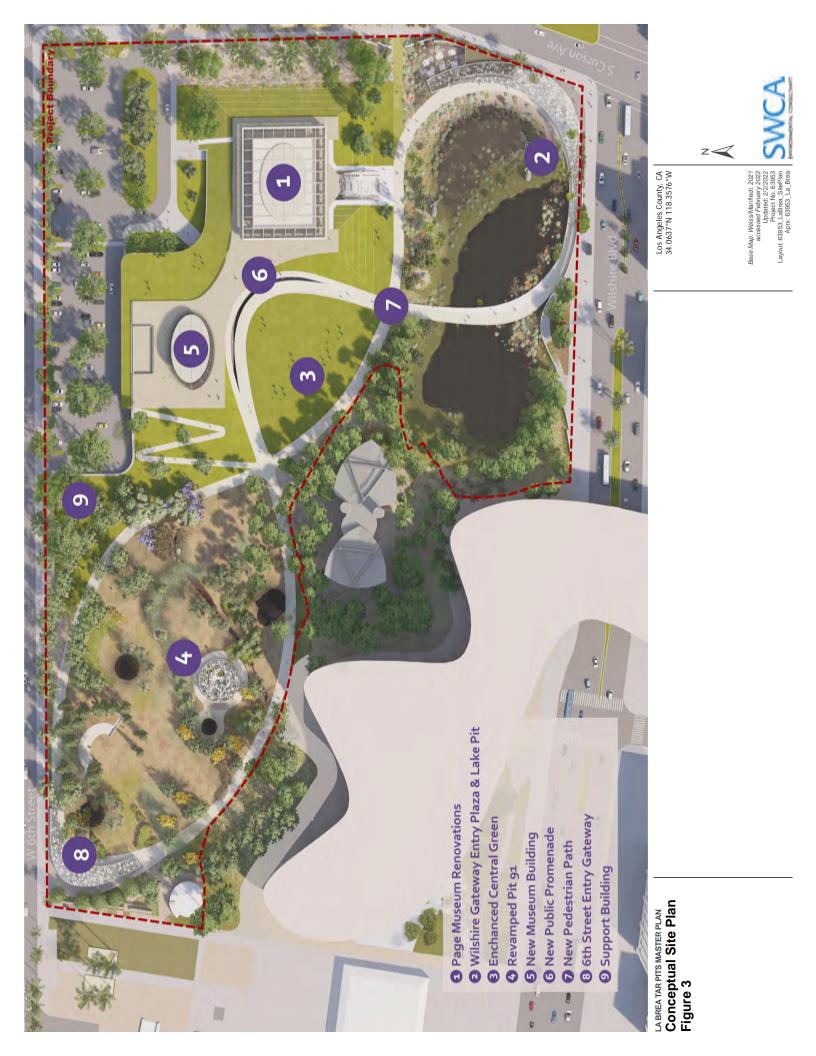

DOCUMENT AVAILABILITY

This NOP and additional information regarding the La Brea Tar Pits Master Plan Project is available for review at <u>tarpits.org/reimagine</u>

Thank you for your participation in the environmental review of this project.

Broad Topic	Comment Summary	Туре	Date of Comment	EIR Section
Tribal Cultural Resources	Comment letter includes information about compliance with Assembly Bill 52, Senate Bill 18, and tribal consultation.	AGENCY	2/16/2022	Section 5.14: Tribal Cultural Resources
Recreational Amenities	Commenter supports inclusion of a children's playground within the project site.	INDV	2/17/2022	Not a comment on environmental impact analysis.
Construction	Commenter asked about timing and length of construction activities.	INDV	02/21/2022; 2/23/2022	Chapter 3: Project Description
Construction; Design	Commenter asked about length of construction activities.	INDV	2/22/2022	Chapter 3: Project Description
	Commenter suggests the museum create a "hall of La Brea" to showcase resources found on site and a "bird hall" to showcase bird fossils found on site.			Not a comment on environmental impact analysis.
Public Scoping	Commenter asked about timing and registration of public scoping meeting.	INDV	2/24/2022	Chapter 1: Introduction
Design	Commenter requests the museum design "reference other tar pits of the world" and other fossil localities in California.	INDV	2/25/2022	Not a comment on environmental impact analysis.
Landscaping; Design; Public Transit;	Commenter requests native and drought-conscious landscaping.	INDV	3/2/2022	Chapter 3: Project Description
Lighting	Commenter is interested in further details regarding the design of the Lake Pit pedestrian bridge.			The design of a possible pedestrian bridge over the Lake Pit is at the conceptual stage only and no further details are discussed in the
	accessibility and parking. Requests more public transit accessing the site, notably the Metro 720 express bus line.			EIR. Section 5.13: Transportation
	Commenter expressed concern regarding light pollution coming from the site.			Section 5.1: Aesthetics
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/3/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/3/2022	Not a comment on environmental impact analysis; however, the

Broad Topic	Comment Summary	Туре	Date of Comment	EIR Section
				project does include a possible small dog park.
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/3/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter discourages inclusion of a dog park within the project site, supports focus on the "science, sustainability, and general park space."	INDV	3/4/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter discourages inclusion of a dog park within the project site due to odor and nuisance.	INDV	3/4/2022	The project does include a possible small dog park. Section 5.2 Air Quality (re: Odor impact analysis)
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/4/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Lighting; Landscaping; Public Transit	Commenter requests a meeting with NHM staff to discuss design. Commenter expresses concern regarding light pollution, supports replacement of trees, and expresses support for current efforts to improve public transportation/circulation and pedestrian pathways in the vicinity.	INDV	3/9/2022	Section 5.1: Aesthetics, Section 5.3: Biological Resources, and Section 5.14: Transportation
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/10/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/10/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/11/2022	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Recreational Amenities	Commenter supports inclusion of a dog park within the project site.	INDV	3/12/2022	Not a comment on environmental impact analysis; however, the

Broad Topic	Comment Summary	Туре	Date of Comment	EIR Section
				project does include a possible small dog park.
Biological Resources; Landscaping	Comment letter states Monarch Butterfly meets CEQA definition of threatened or endangered species; recommends survey, analysis, and mitigation. Comment notes potential for nesting birds on site; recommends avoidance and mitigation measures. Comment recommends DEIR contain landscaping plan and replacement tree species list. Project should include only native species. Comment recommends inclusion of infectious tree disease management plan or pest management mitigation measures. Comment recommends DEIR discuss rodenticide use. DEIR should contain biological baseline assessment.	AGENCY	3/14/2022	Section 5.3: Biological Resources
Public Transit, Transportation	Comment letter recommends DEIR include information/analysis on existing and planned transit services and facilities in the project vicinity. Comment recommends transit-oriented planning and design, provides recommendations and resources.	AGENCY	3/16/2022	Section 5.14: Transportation
Air Quality	Comment letter provides input on the content and format of the air quality and greenhouse gas analyses.	AGENCY	3/15/2022	Section 5.2: Air Quality
Design, Historic Resources	Comment letter recommends comprehensive analysis of impacts to historic resources and inclusion of historic preservation objectives and goals. Comment requests additional coordination with the project team.	ASSOCIATION	3/16/2022	Section 5.5: Cultural Resources, Historical Resources

Broad Topic	Comment Summary	Туре	Date of Comment	EIR Section
Landscaping; Design; Lighting Recreational Amenities	Comment letter provides input on the design of the pedestrian pathways and landscaping of the project. Comment expresses concern regarding removal of trees, the re- conception of the Space Frame and Frieze around the interior atrium, and light pollution. Comment supports inclusion of a dog park on the project site.	ASSOCIATION	3/17/2022	Chapter 3: Project Description, Section 5.1: Aesthetics, and Section 5.3: Biological Resources
Landscaping; Design; Lighting	Commenter appreciates the open space of the project site and emphasizes retaining trees on site. Recommends planting native trees for shade over pedestrian pathways. Comment expresses concern regarding light pollution.	INDV	3/17/2022	Section 5.1: Aesthetics, and Section 5.3: Biological Resources
Landscaping; Design	Commenter expresses appreciation for the existing style/architecture of the Page Museum. Commenter notes the sump pump on northwest side of the building isn't working and the pedestrian walkways need to be resurfaced. Commenter appreciates the landscape art (Mammoth/Mastodon statues) and Amphitheater. Commenter states removing any trees on site would be unfortunate.	INDV	3/30/2022	Section 5.3: Biological Resources (re: tree removal)
Design	Comment supports inclusion of a dog park on the project site.	INDV	3/2/22	Not a comment on environmental impact analysis; however, the project does include a possible small dog park.
Design	Commenter requests expanded park hours.	INDV	3/2/22	Not a comment on the environmental impact analysis. Not addressed in the EIR.
Design	Commenter interested in further details regarding the design of the Lake Pit pedestrian bridge.	INDV	3/2/22	The design of a possible pedestrian bridge over the Lake Pit is at the conceptual stage only and no further details are discussed in the EIR.

Broad Topic	Comment Summary	Туре	Date of Comment	EIR Section
Biological Resources; Landscaping	Commenter expresses information about tree removal and replacement.	INDV	3/2/22	Section 5.3: Biological Resources
Biological Resources	Commenter expresses support for rabbit population in the park.	INDV	3/2/22	Not a comment on the environmental impact analysis. Not addressed in the EIR.
Lighting	Commenter expresses concern regarding light pollution.	INDV	3/2/22	Section 5.1: Aesthetics
Bike Accessibility	Commenter inquired about bike accessibility within the park pathways.	INDV	3/2/22	Section 5.14: Transportation
Security	Commenter asks about security measures being considered as part of the project.	INDV	3/2/22	Not a comment on the environmental impact analysis. Not addressed in the EIR.
Design	Commenter asks about changes to the content of the exhibits.	INDV	3/2/22	Chapter 3: Project Description
Design	Commenter asks for details regarding the proposed change in museum size and footprint.	INDV	3/2/22	Chapter 3: Project Description
Cumulative Construction Impacts	Commenter asks about impacts of other nearby construction projects.	INDV	3/2/22	Chapter 4: Environmental Setting
Parking and Traffic	Commenter inquires about parking spaces and school bus access. Commenter also asks about traffic impacts.	INDV	3/2/22	Section 5.14: Transportation
Design	Commenter asks about plans to alter the lake pit.	INDV	3/2/22	Chapter 3: Project Description
Design	Commenter asks if park will expand in size.	INDV	3/2/22	Not a comment on the environmental impact analysis. However, for informational purposes it is noted that Chapter 3: Project Description describes all the components of the proposed Master Plan. Expansion of the park is not included in the proposed project.
